

Tablets have become an integral part of many work environments. They allow access to information no matter where you are. But how do you effectively incorporate them into your workstation? The MY tab from Novus More Space is a spring-loaded tablet holder that lifts a tablet off the desk so it's in the perfect viewing position and within easy reach.

The MY tab is designed to attach to a MY fix mount for easy integration into your work flow. It opens along a sliding, spring loaded track for easy, one-handed placement and release. No

worries about slipping – the tablet is gripped gently and securely with soft, rubberized pads. The MY tab features a Quick Release attachment that allows the MY tab to easily be removed, or added, to any MY monitor mount.

The MY tab holds tablets ranging in size from 6.25" to 11.75" in either portrait or landscape position for greater versatility. The MY tab is also available as the free-standing MY point which includes a 9.84" anodized aluminum column with a metal base for stability. Available in black or white.
